Authentification AD sur pfsense

Prérequis

- Avoir Pfsense installé
- Avoir un Active Directory fonctionnel
- Avoir mis en tant que DNS principal sur Pfsense votre Active Directory

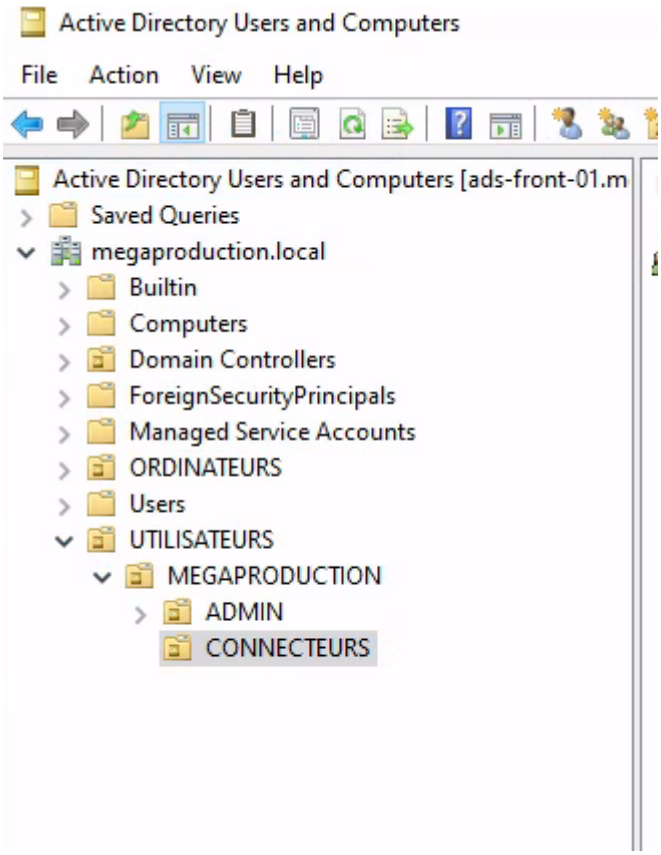

Préparation

Il vous faudra ici créer une OU, un groupe et un utilisateur spécifique afin de lié Pfsense à l'AD. Je m'explique, l'utilisateur créé nous permettra de lister les utilisateurs d'un ou plusieurs groupe AD.

Mise en place

Préparation des groupe active directory

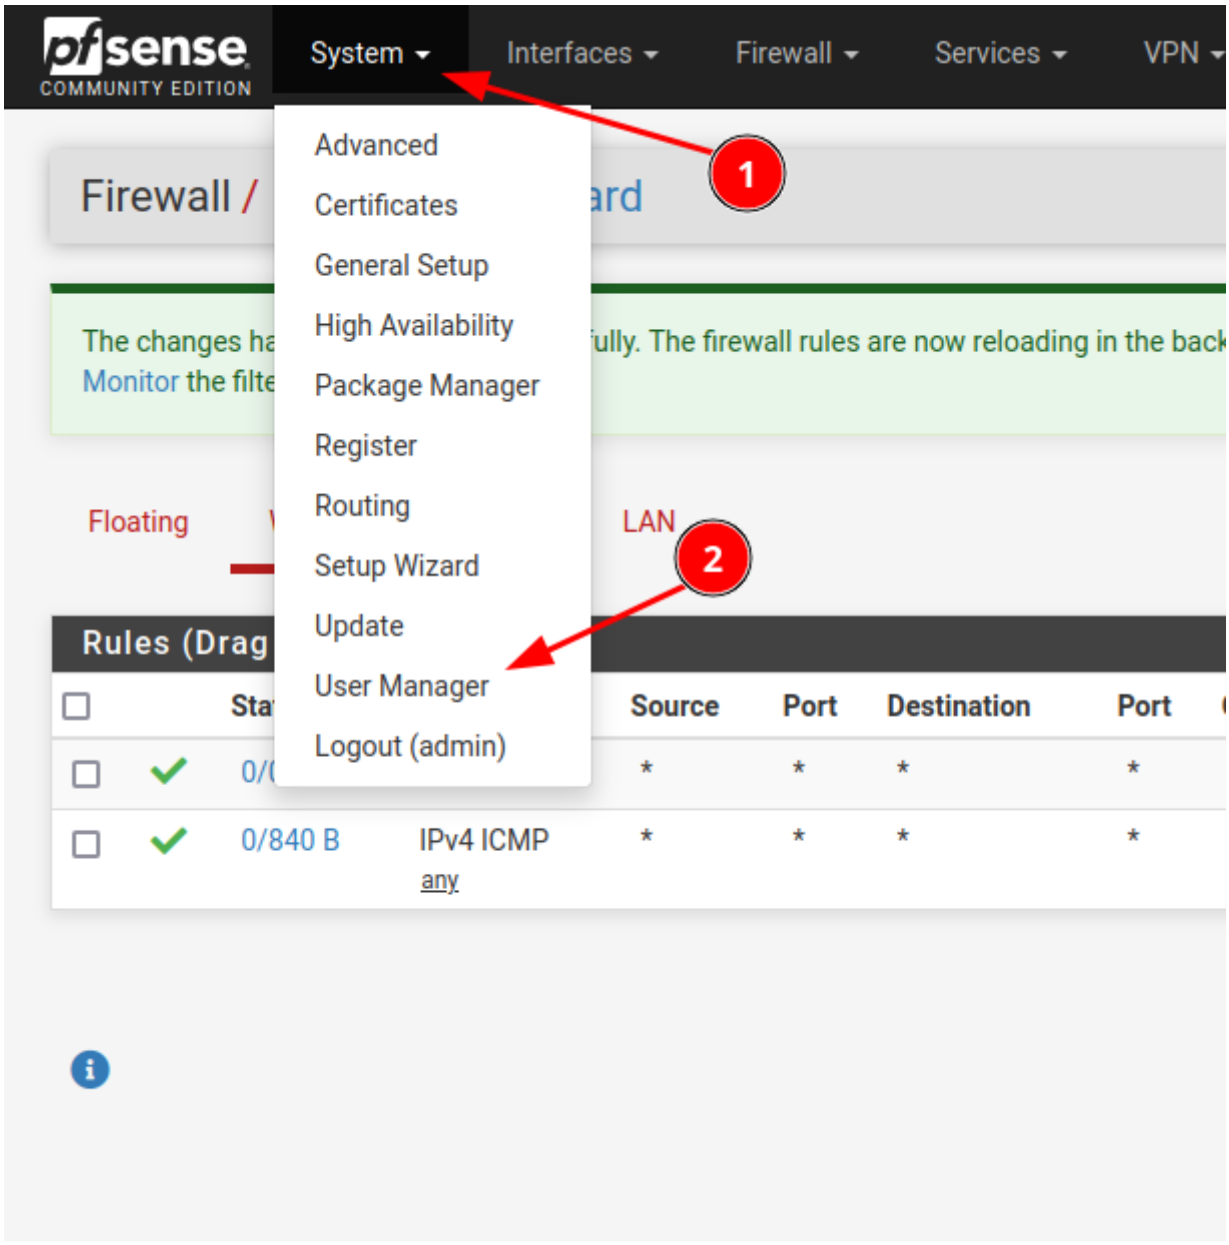

Voici l’arborescence de mon Active Directory

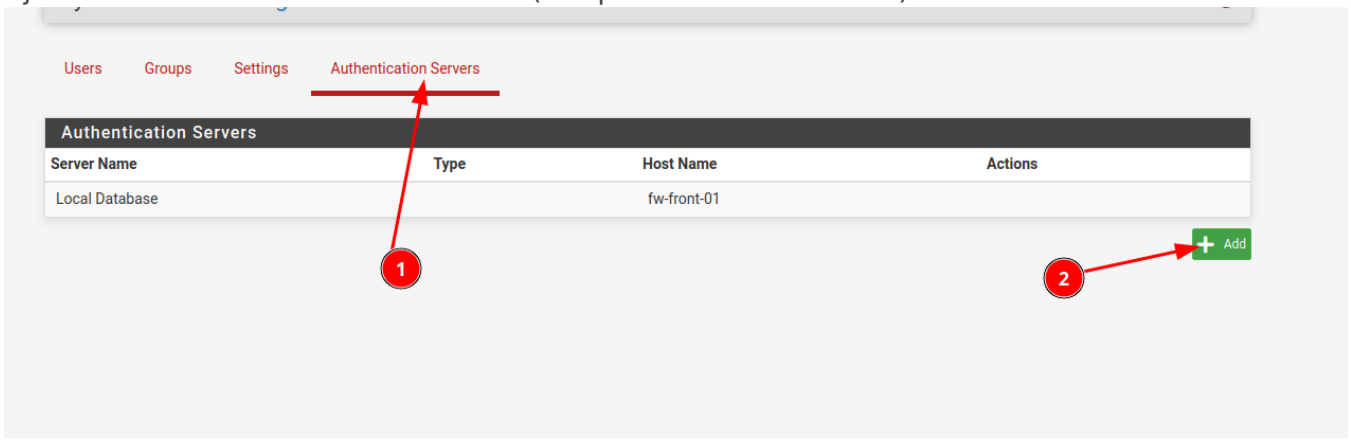

1. Créer un groupe GG_users_pfsense dans l'OU CONNECTEURS
2. Créer un utilisateur bind_pfsense et le mettre dans le groupe GG_users_pfsense

Préparation de Pfsense

1. Aller dans les paramètres utilisateurs

2. Ajouter un serveur d'authentification (Ne pas faire save à la fin)

Server Settings

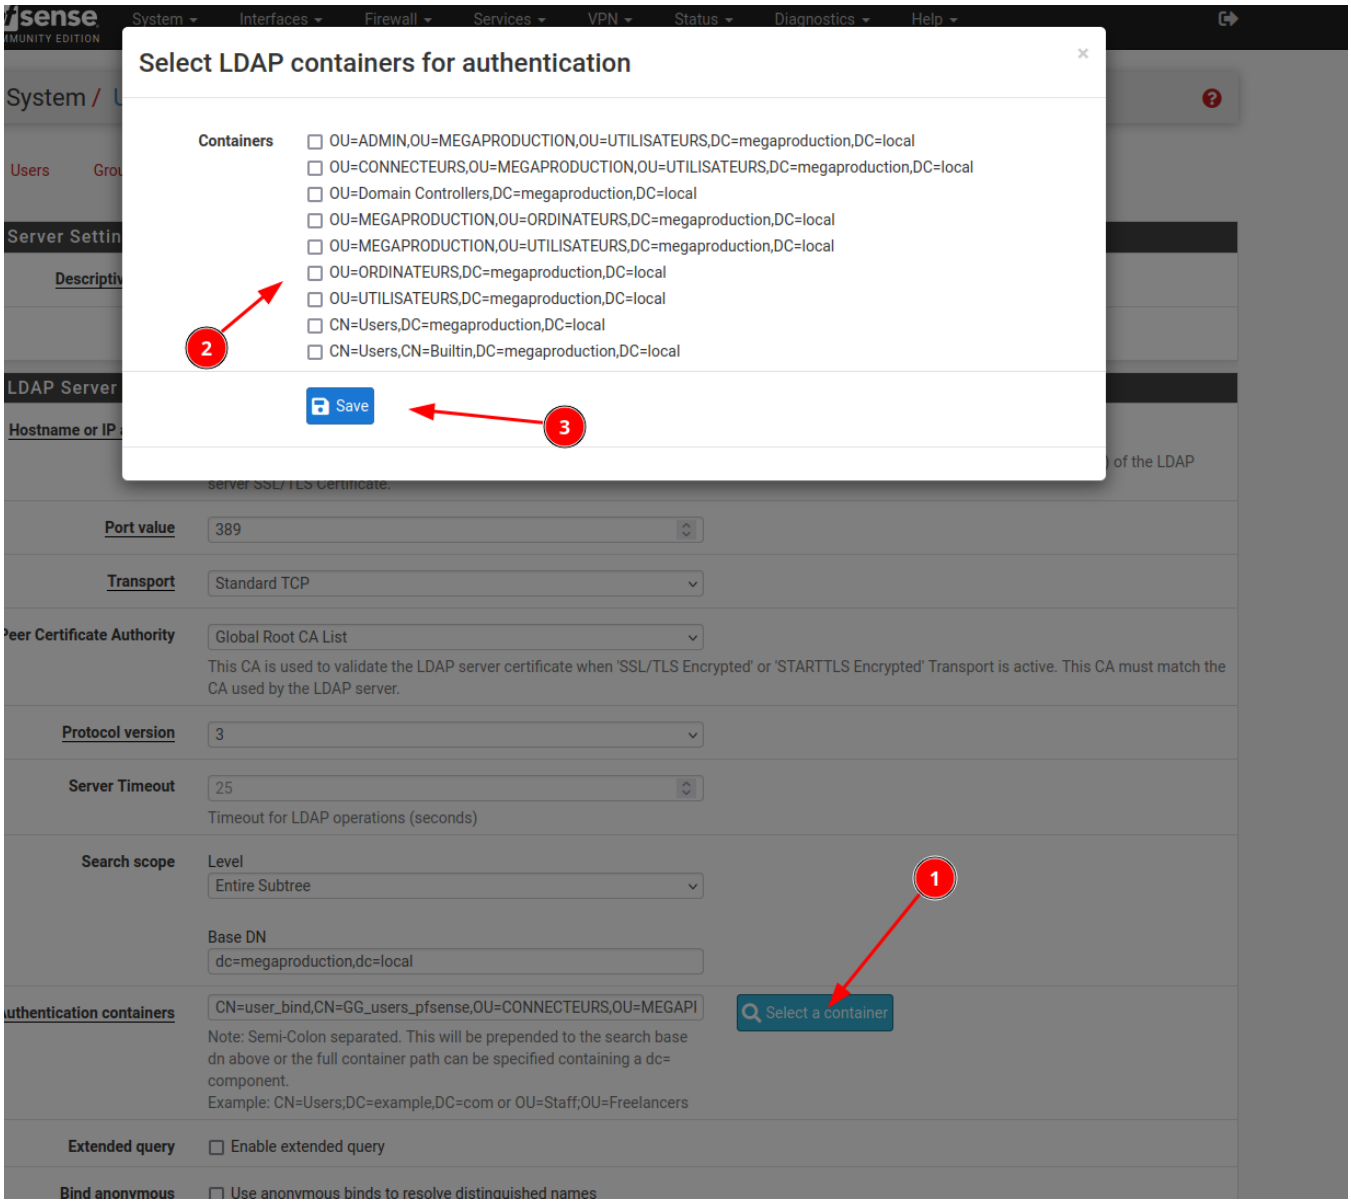

Descriptive name	ads-front-01
Type	LDAP

LDAP Server Settings

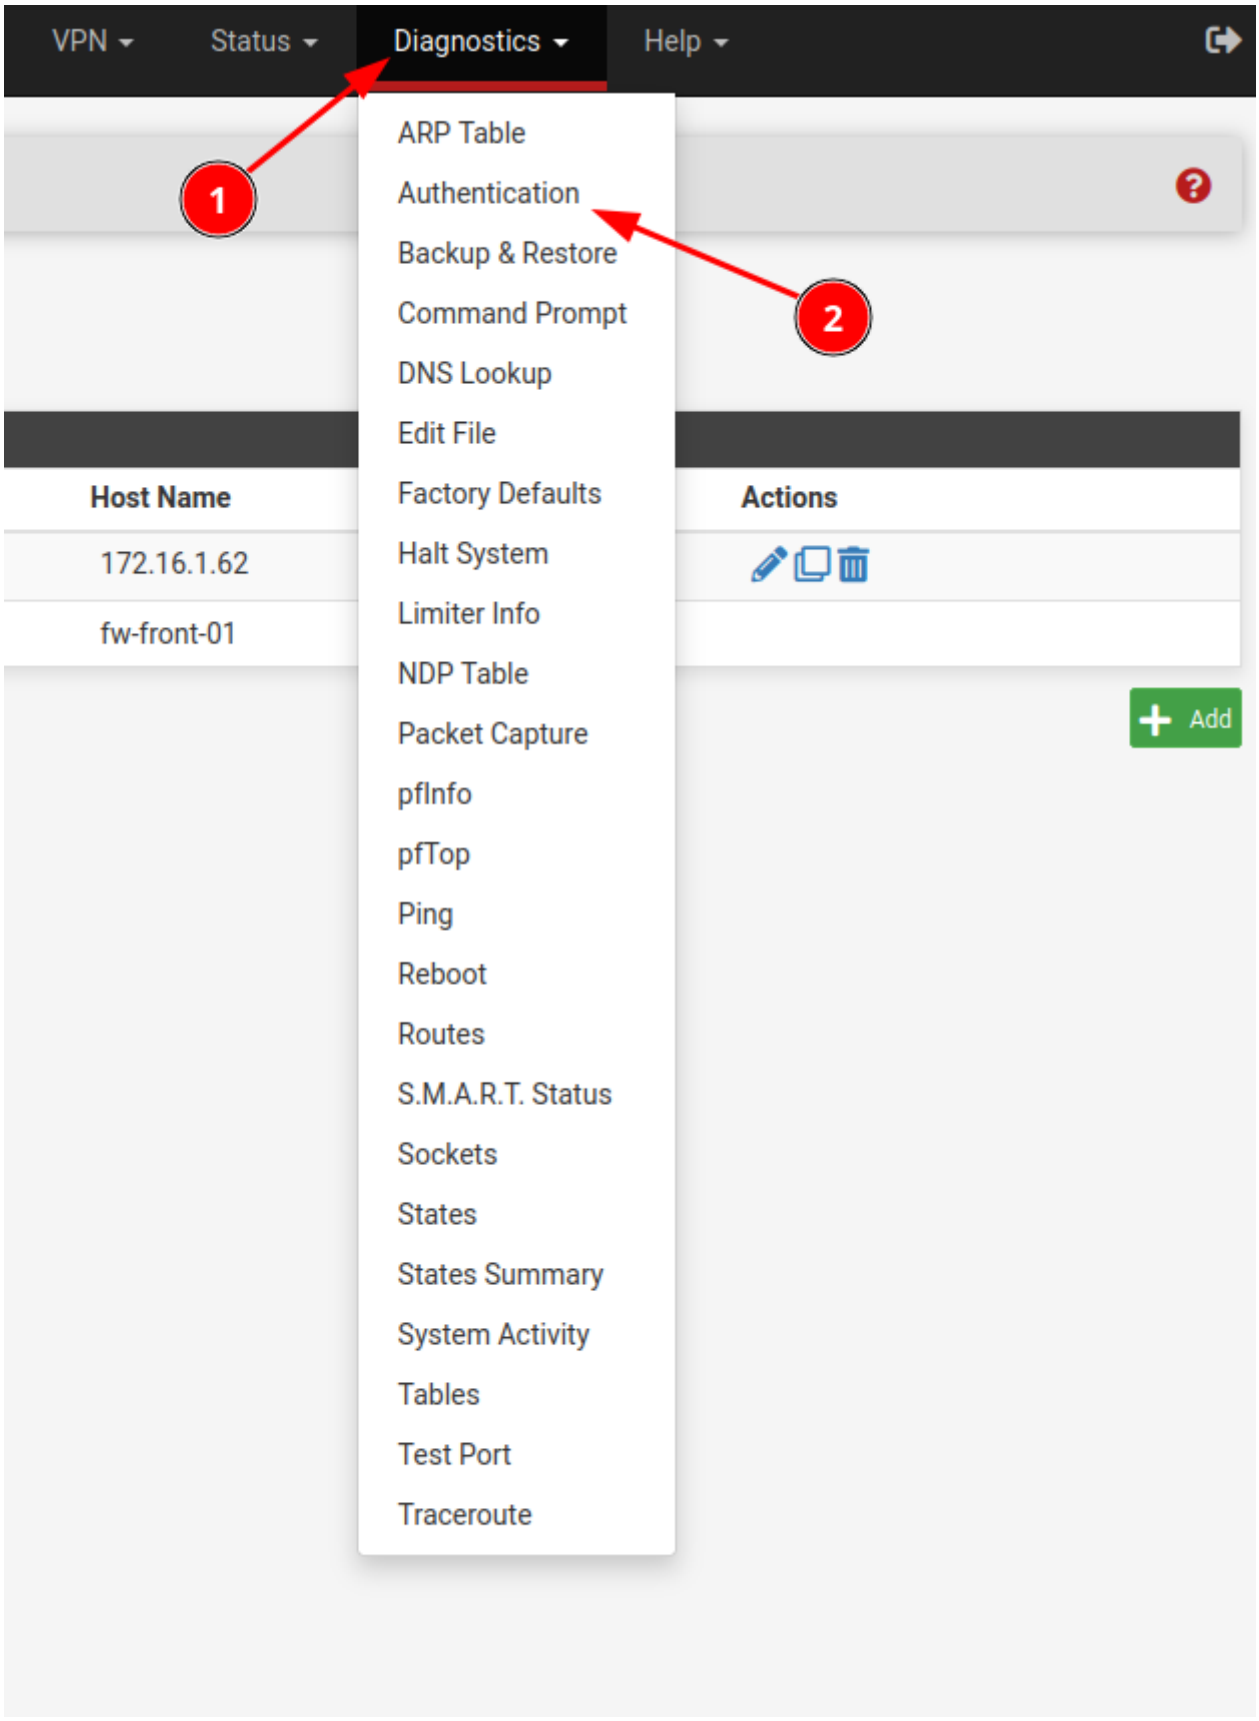

Hostname or IP address	172.16.1.62 NOTE: When using SSL/TLS or STARTTLS, this hostname MUST match a Subject Alternative Name (SAN) or the Common Name (CN) of the LDAP server SSL/TLS Certificate.
Port value	389
Transport	Standard TCP
Peer Certificate Authority	Global Root CA List This CA is used to validate the LDAP server certificate when 'SSL/TLS Encrypted' or 'STARTTLS Encrypted' Transport is active. This CA must match the CA used by the LDAP server.
Protocol version	3
Server Timeout	25 Timeout for LDAP operations (seconds)
Search scope	Level Entire Subtree Base DN dc=megaproduction,dc=local
Authentication containers	CN=user_bind,CN=GG_users_pfsense,OU=CONNECTEURS,OU=MEGAPI Note: Semi-Colon separated. This will be prepended to the search base dn above or the full container path can be specified containing a dc= component. Example: CN=Users;DC=example,DC=com or OU=Staff;OU=Freelancers Select a container
Extended query	☐ Enable extended query
Bind anonymous	☐ Use anonymous binds to resolve distinguished names
Bind credentials	bind_pfsense •••••••
Initial Template	Microsoft AD
User naming attribute	samAccountName

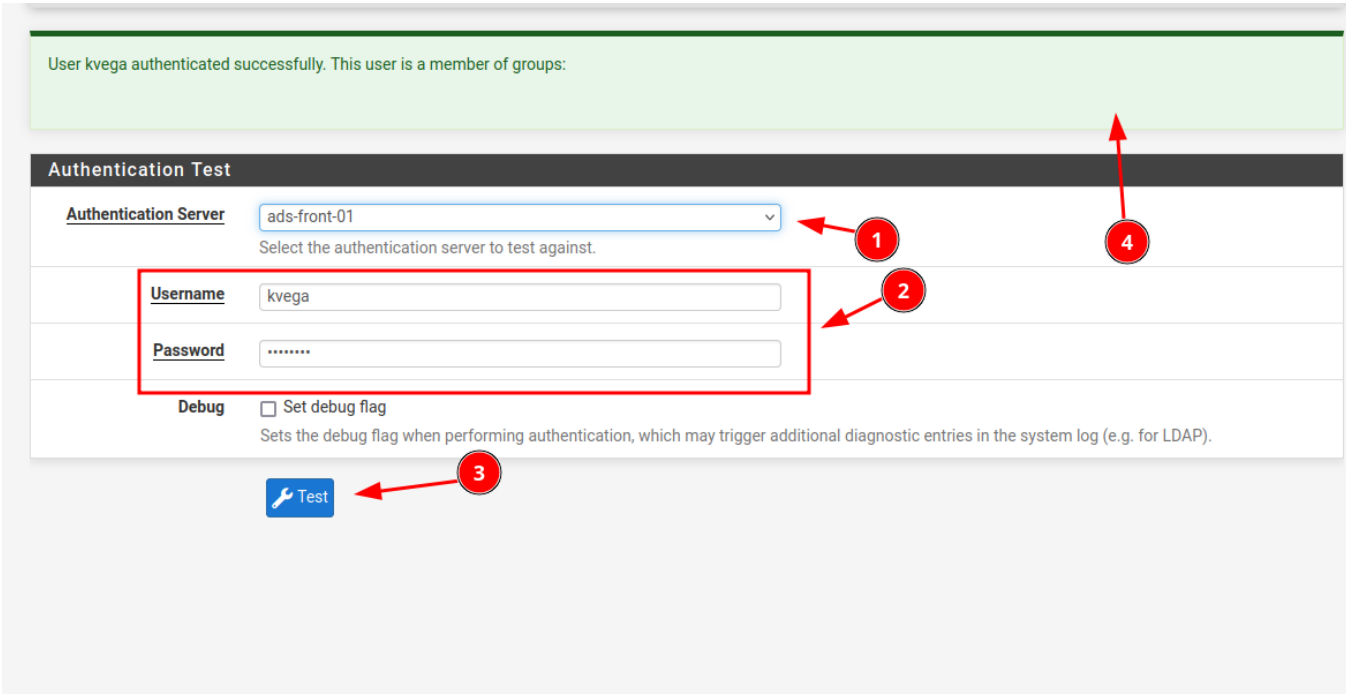

3. Choisir le container d'authentification

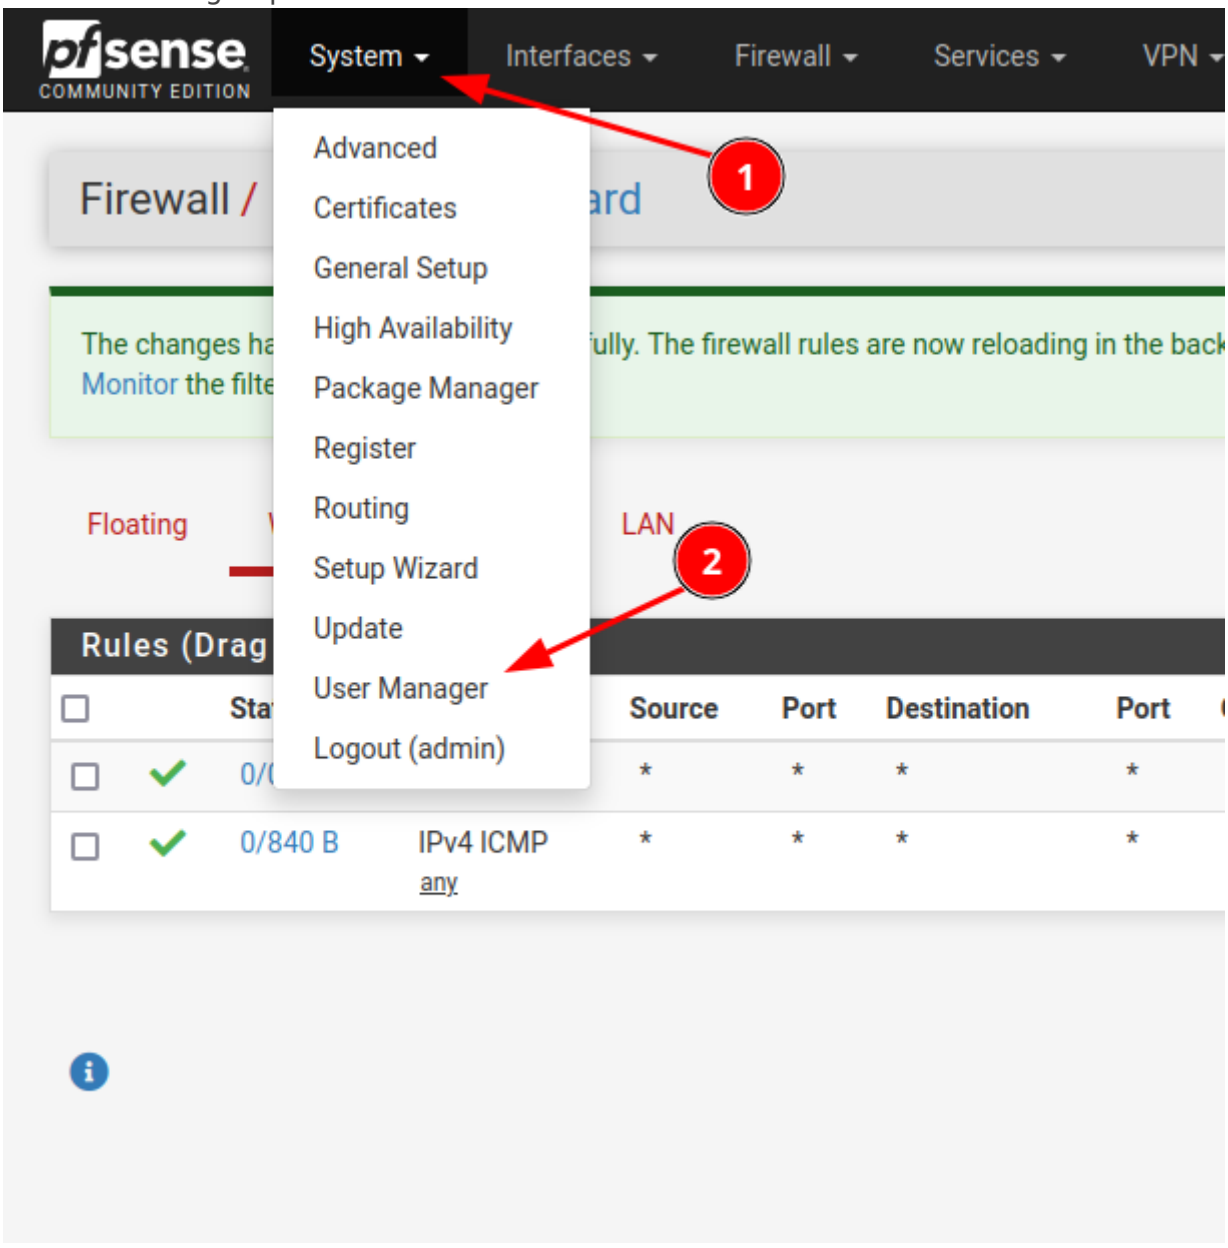

4. Sauvegarder la configuration.
5. Tester l'authentification
