

Ajout d'une clé ssh

Tout d'abord on va générer une clé ssh.

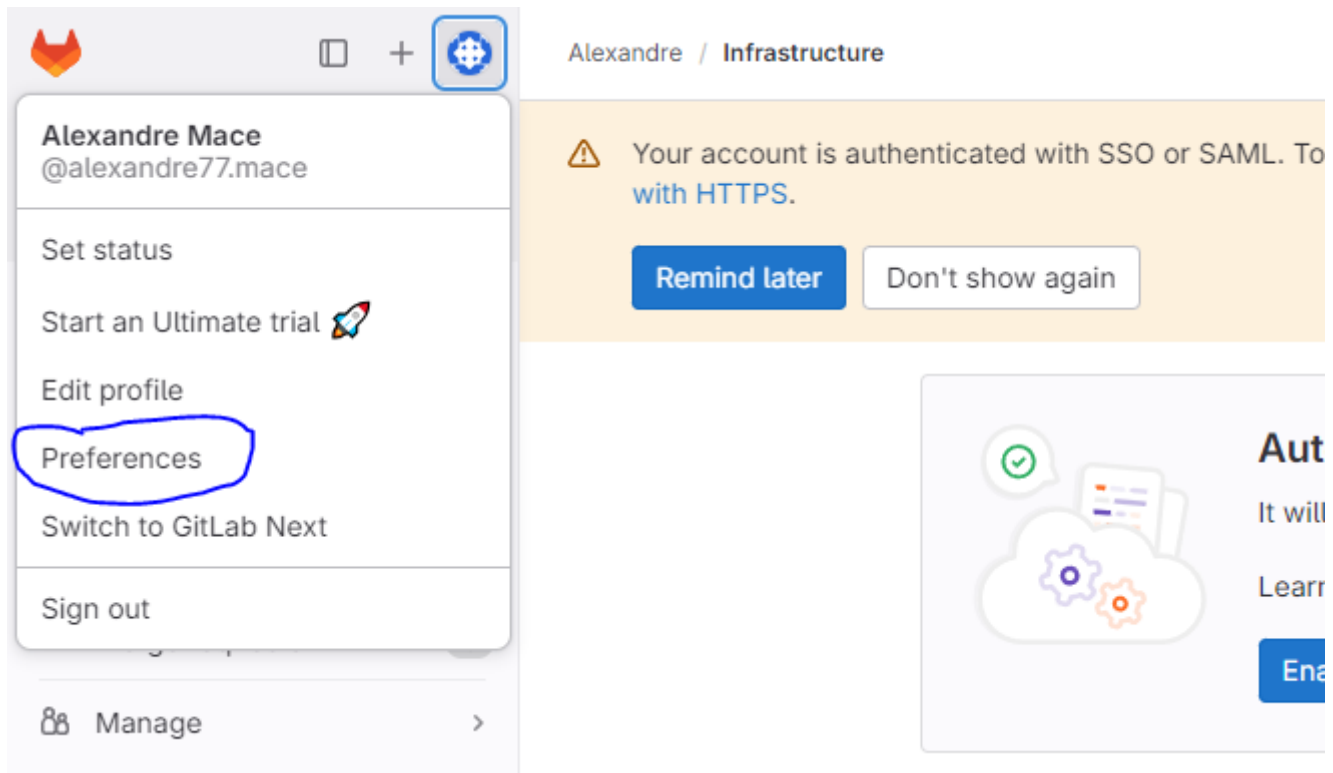

```
ssh-keygen -t ed25519
```

Puis on va afficher la clé ssh que l'on viens de générer.

```
cat .ssh/id_ed25519.pub  
ssh-ed25519 AAAAC8GNJDBVDGDIG80F9XiRtNILBJFDGDDJTaIo4rZUn6 root@BASTION-FRONT-01
```

On va aller l'ajouter au repo git.

Se rendre dans l'onglet preferences.

Allez dans SSH Keys.

SSH Keys

Et ajouter la .

Ensuite on va executer les ssh-agent.

```
exec ssh-agent bash
```

Maintenant on va ajouter la clé ssh privé.

```
ssh-add ~/.ssh/id_ed25519
```
